

BonFIRE

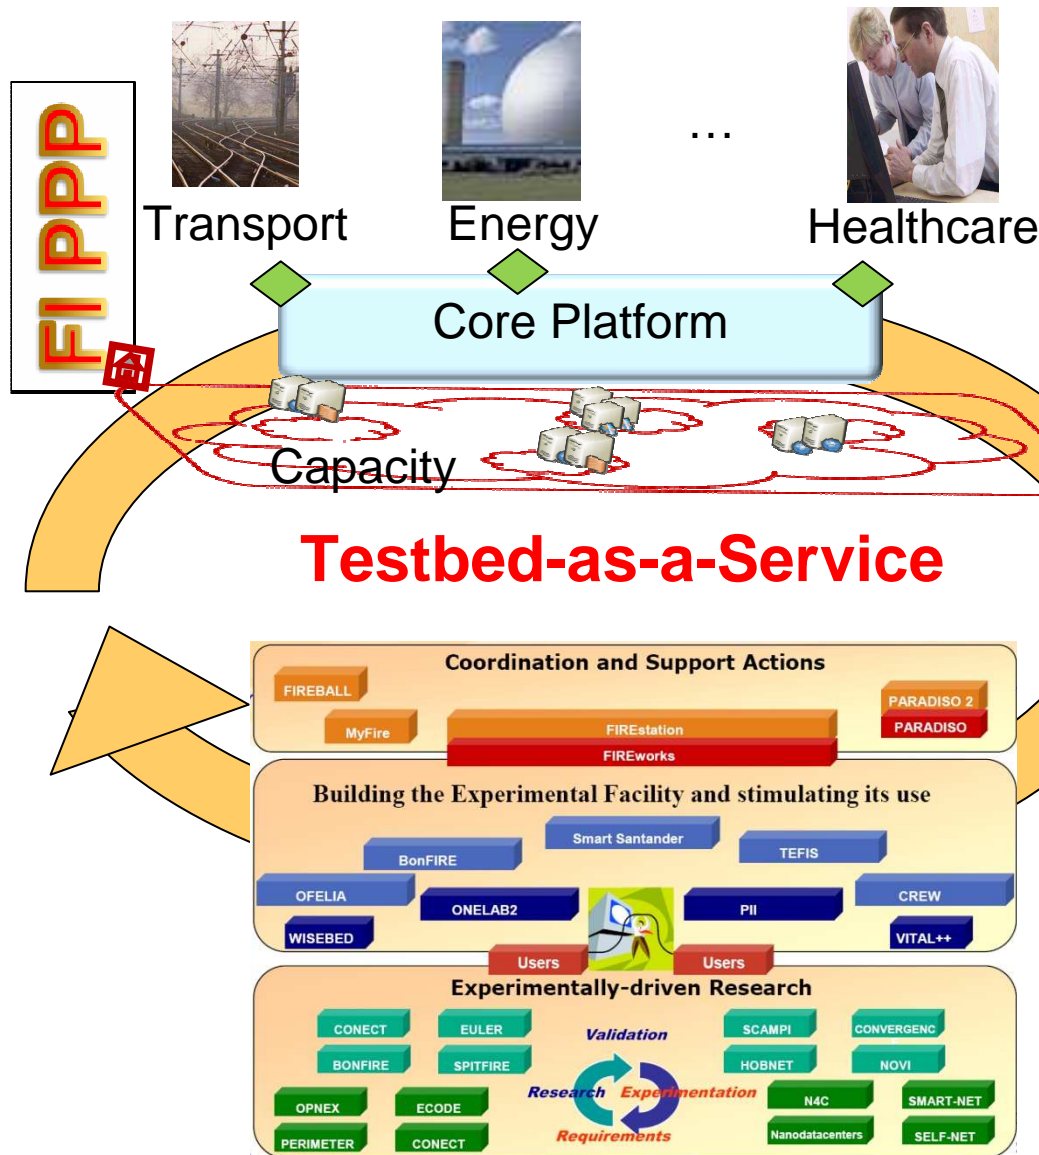

Building service testbeds on FIRE

BonFIRE and FI-PPP

Josep Martrat

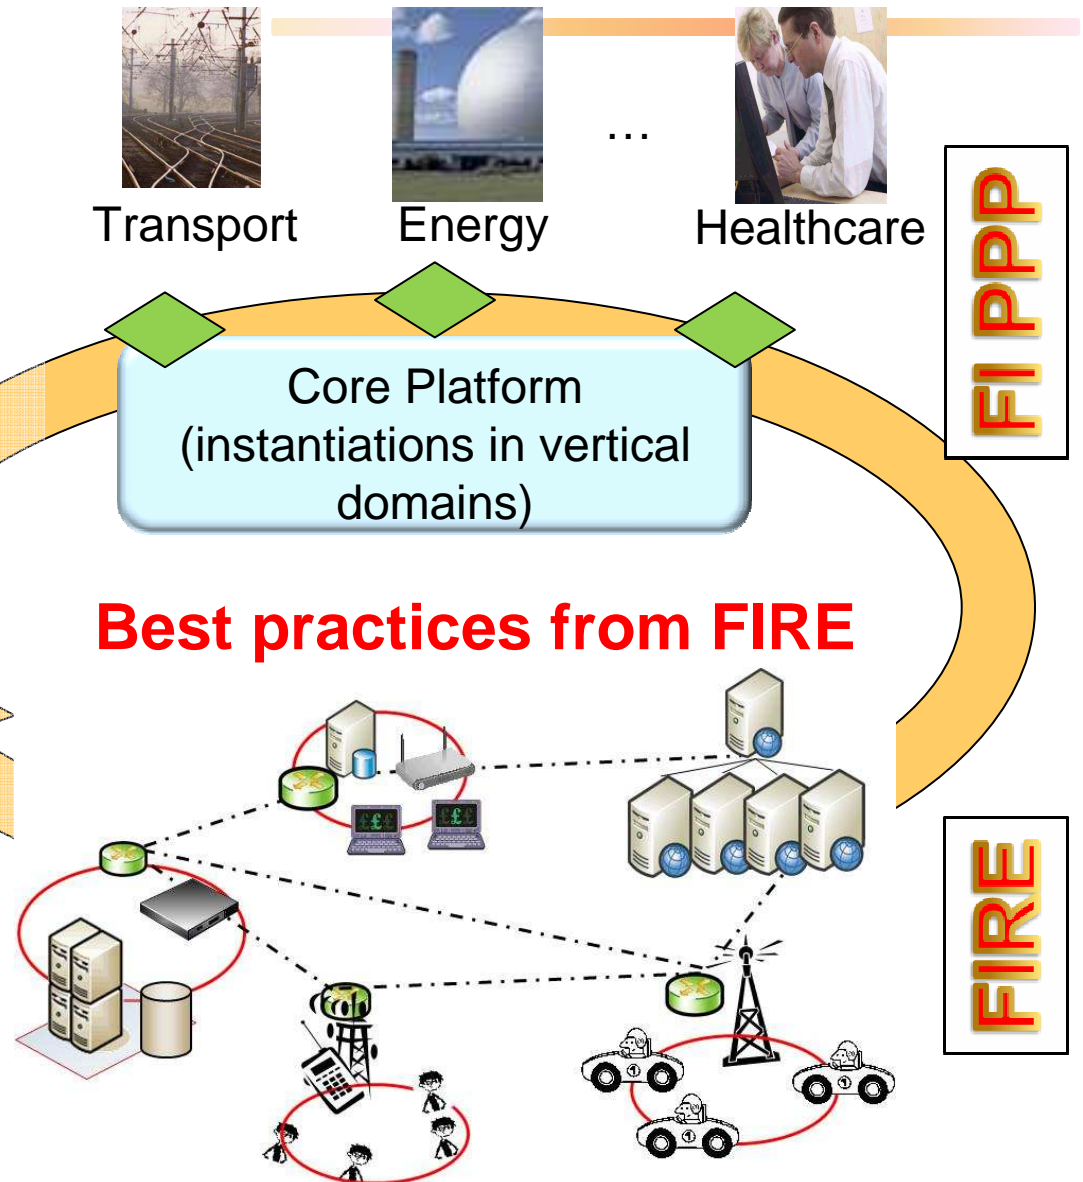

ATOS ORIGIN

Barcelona, 30 June 2010

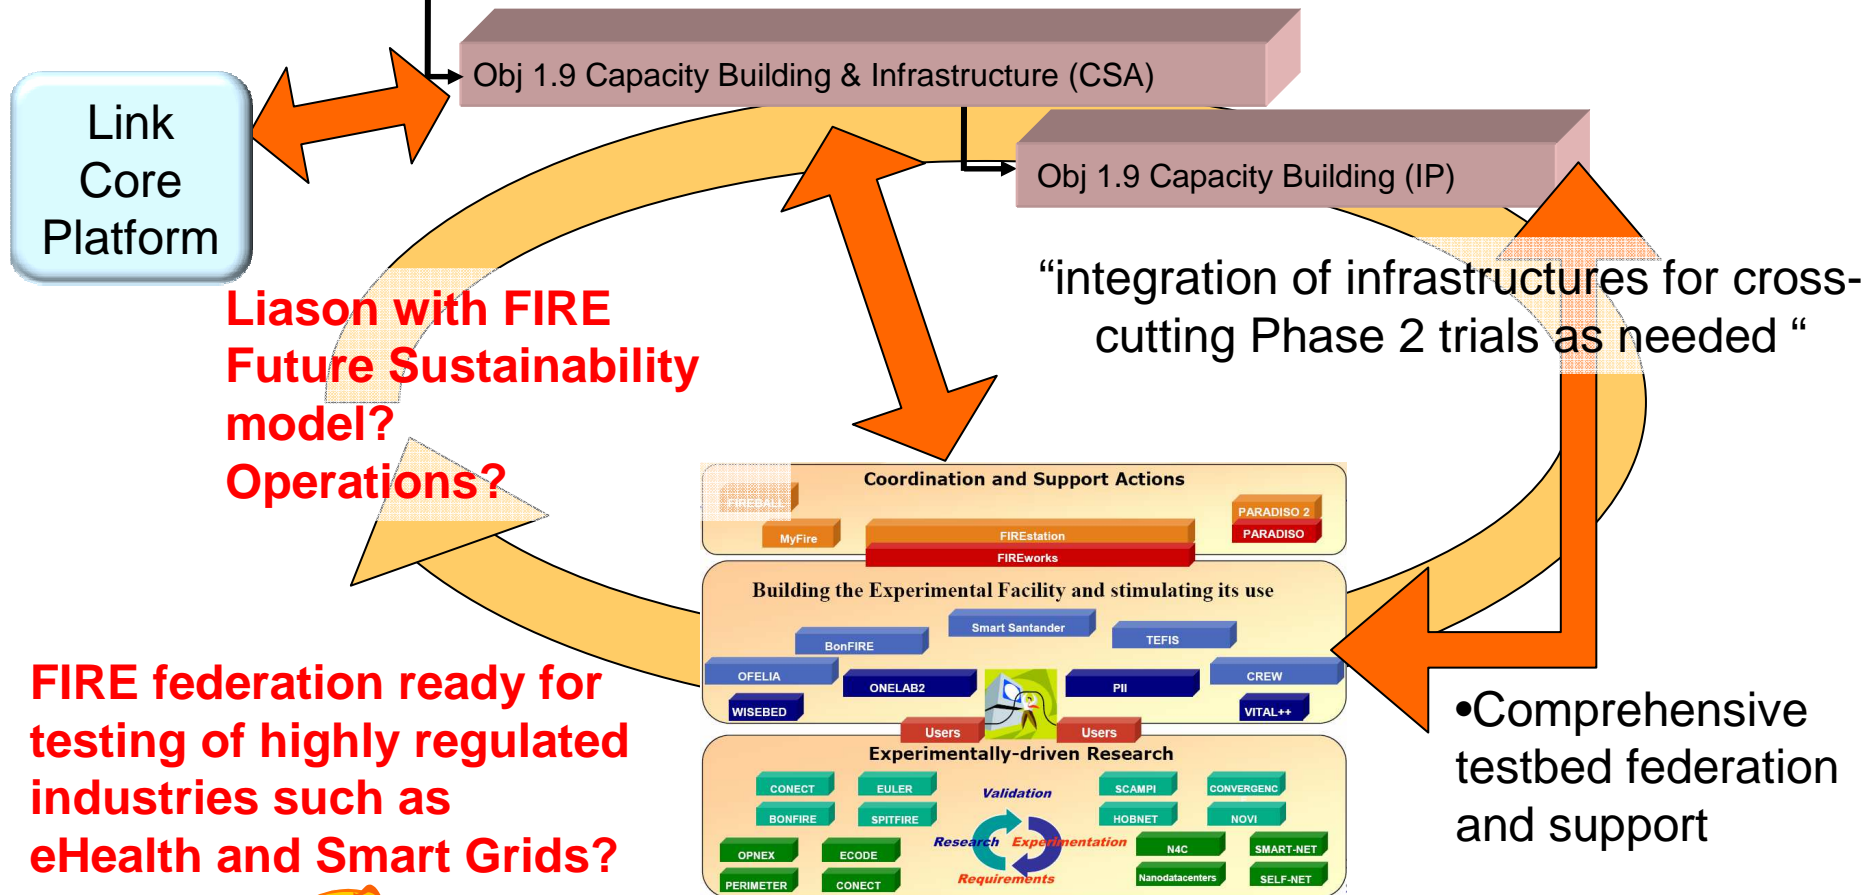

- Test elements of the core platform
- Prototype implementations
- Trial integrations of core platform enablers
- Use Case testing
- Future sustainability

- The FIRE facility is already heading for a **generic, open** and **secure** federated platform
- Skills and knowledge of **technical federation**
- Hands on experience of managing multiple and diverse **use cases**
- Non-technical aspects** (policy, legal, IPR)

“identify candidates for experimental infrastructures for Phases 2 and 3”

“Leverage existing public investments in advanced infrastructures”

FIRE federation ready for testing of highly regulated industries such as eHealth and Smart Grids?
